

# **TRIAL NEGERI 2022 PROBABILITY DISTRIBUTION OR TABURAN KEBARANGKALIAN KSSM ADD MATHS SPM**

## **SIR VEN**

# Q1: PERLIS

- a) Dalam suatu kampung, didapati kebarangkalian belia ialah  $p$ . Diberi bahawa bilangan belia mempunyai min 40 dan varians 28.

*In a village it is found that the probability of youth is  $p$ . It is given that the number of youths has mean of 40 and variance of 28.*

- (i) Cari nilai  $p$ .

*Find the value of  $p$ .*

- (ii) Jika 5 orang penduduk dipilih secara rawak, cari kebarangkalian bahawa sekurang-kurangnya 3 orang ialah belia.

*If 5 residents are selected at random from the area, find the probability that at least 3 of them are youths.*

[5 markah/ 5 marks]

- b) Jisim sebiji buah durian Musang King yang dihasilkan di sebuah kebun mempunyai taburan normal dengan min 3.8 kg dan sisihan piawai 700 g. Kira  
*The masses of Musang King durians produced in an orchard are normally distributed with mean of 3.8 kg and standard deviation of 700 g. Calculate*

- (i) kebarangkalian bahawa sebiji durian yang dipilih secara rawak dari kebun itu mempunyai jisim melebihi 4.5 kg.  
*the probability that a durian is chosen at random from the orchard has a masses more than 4.5 kg.*

- (ii) nilai  $m$  jika 68% daripada durian tersebut mempunyai jisim kurang  $m$  kg.  
*the value of  $m$  if 68% of the durians have masses less than  $m$  kg.*

[5 markah /5 marks]

11  
(a)  
(i)

$$40q = 28$$

K1

N1  $p = \frac{3}{10}$

(ii)

Guna  ${}^nC_r \times \left(\frac{3}{10}\right)^r \times \left(\frac{7}{10}\right)^{n-r}$

K1

$$P(X \geq 3) = P(X = 3) + P(X = 4) + P(X = 5)$$

P1

0.16308

N1

(b)  
(i)

$$P\left(Z > \frac{4.5 - 3.8}{0.7}\right)$$

K1

N1 0.1587

(ii)

$$z = \pm 0.468$$

P1

$$\frac{m-3.8}{0.7} = 0.468$$

K1

N1  $m = 4.1276$

## Q2: SABK (AGAMA)

- (a) Dalam satu tinjauan yang dijalankan ke atas murid-murid di sebuah sekolah, didapati 6 daripada 10 orang murid memakai cermin mata. Jika 5 orang murid dipilih secara rawak, hitung kebarangkalian bahawa

*In a survey carried out in a school, it is found that 6 out of 10 students wear glasses.*

*If 5 students from that school are chosen at random, calculate the probability that*

- (i) tepat 3 orang murid memakai cermin mata,  
*exactly 3 students wear glasses,*
- (ii) lebih daripada 3 orang murid memakai cermin mata.  
*more than 3 students wear glasses.*

[5 markah]

[5 marks]

- (b) Suatu pemeriksaan kesihatan dijalankan ke atas sekumpulan pekerja. Tekanan darah sekumpulan pekerja itu adalah mengikut taburan normal dengan min 130 mmHg dan sisisian piawai 16 mmHg. Bacaan tekanan darah yang melebihi 150 mmHg diklasifikasikan sebagai tekanan darah tinggi.

*A group of workers are given a medical check up. The blood pressure of the workers has a normal distribution with a mean of 130 mmHg and a standard deviation of 16 mmHg.*

*Blood pressure readings above 150 mmHg are classified as high blood pressure.*

- (i) Seorang pekerja dipilih secara rawak daripada kumpulan tersebut. Cari kebarangkalian bahawa pekerja itu mempunyai tekanan darah antara 110 mmHg dan 152 mmHg.

*A worker is chosen at random from the group. Find the probability that the worker has a blood pressure between 110 mmHg and 152 mmHg.*

- (ii) Didapati bahawa 123 orang pekerja mempunyai tekanan darah tinggi. Cari jumlah pekerja dalam kumpulan itu.

*It is found that 123 workers have high blood pressure. Find the total number of workers in the group.*

# Q11: PAHANG

- (a) Kebarangkalian seorang murid berjalan kaki ke sekolah ialah  $p$ . Suatu sampel 6 orang murid dipilih secara rawak.

*The probability of a student walks to school is  $p$ . A sample of 6 students is selected at random.*

- (i) Jika kebarangkalian bagi kesemua murid itu berjalan kaki ke sekolah ialah 0.04666, cari nilai  $p$ .

*If the probability of all the students walk to school is 0.04666, find the value of  $p$ .*

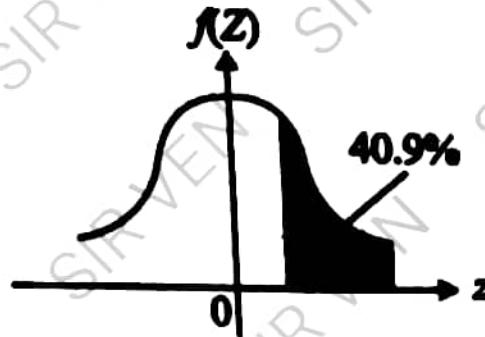

[3 markah/marks]

- (ii) Cari kebarangkalian bahawa lebih daripada 4 orang murid berjalan kaki ke sekolah.

*Find the probability that more than 4 students walk to school.*

[2 markah/marks]

(b)

Rajah 5 /Diagram 5

Rajah 5 menunjukkan satu graf taburan normal piawai yang mewakili isipadu sos cili dalam botol yang dihasilkan oleh sebuah kilang.

*Diagram 5 shows a standard normal distribution graph representing the volume of chili souce in bottles produced by a factory.*

Diberi bahawa min ialah  $900m^3$  dan variansnya ialah  $289m^6$ .

Jika peratus isipadu yang melebihi  $V$  ialah 40.9%, cari

*It is given that the mean is  $900m^3$  and variance is  $289m^6$ .*

*If the percentage of volume more than  $V$  is 40.9%.*

Cari/find

- (i) nilai bagi  $V$ ,  
*the value of  $V$ ,*

[2 markah/marks]

- (ii) kebarangkalian bahawa isipadu antara  $866m^3$  dan  $951m^3$ .

*the probability that the volume between  $866m^3$  and  $951m^3$ .*

[3 markah/marks]

(a)(i)	$\text{(i)} P(X = 6) = {}^6C_6(p)^6(1 - p)^0 = 0.04666 \quad \text{K1}$ $p^6 = 0.04666$ $6 \log_{10} p = \log_{10} 0.04666 \quad \text{K1}$ $\log_{10} p = \frac{\log_{10} 0.04666}{6}$ $p = 0.6 \quad \text{N1}$

# Q15: JOHOR

- (a) Diketahui bahawa 10% daripada telefon bimbit yang dihasilkan oleh sebuah kilang adalah rosak. Cari kebarangkalian bahawa daripada 8 buah telefon bimbit yang dipilih secara rawak,

*It is found that 10% of the mobile phones produced in a factory are spoilt.  
Find the probability that out of 8 mobile phones chosen randomly.*

- (i) tepat 3 telefon bimbit rosak.  
*exactly 3 mobile phones are spoilt.*
- (ii) lebih daripada 5 telefon bimbit dalam keadaan baik.  
*more than 5 mobile phones are in good condition.*

[5 markah/ marks]

- (b) Dalam pertandingan Explorace yang disertai oleh 600 pelajar, masa yang diambil untuk menghabiskan perlumbaan adalah bertabur secara normal dengan min 25 minit dan sisihan piawai 8 minit. Peserta tidak akan diberi sebarang mata jika mereka mengambil masa lebih daripada 35 minit untuk menghabiskan perlumbaan .

*In an Explorace competition participated by 600 students, the time taken to complete the race follows a normal distribution with a mean of 25 minutes and a standard deviation of 8 minutes. Participants will not be given any points if they take more than 35 minutes to complete the race.*

- (i) Jika seorang peserta dipilih secara rawak, cari kebarangkalian bahawa peserta itu tidak mendapat sebarang mata.

*If a participant is chosen at random, find the probability that the participant does not get any point.*

- (ii) Piala akan hadiahkan kepada 100 peserta pertama yang mengambil masa kurang daripada t minit untuk menghabiskan perlumbaan. Cari nilai t.

*Trophies were awarded to the first 100 participants who took less than t minutes to complete the race. Find the value of t.*

[5 markah/ marks]

(a) (i)

$$P(X = 3) = {}^8C_3(0.1)^3(0.9)^5$$

$$= 0.03307$$

$$(ii) P(X > 5) = P(X = 6) + P(X = 7) + P(X = 8)$$

$$= {}^8C_6(0.9)^6(0.1)^2 + {}^8C_7(0.9)^7(0.1)^1 + {}^8C_8(0.9)^8(0.1)^0$$

$$= 0.9619$$

$$(b) (i) P(X > 35)$$

$$= P\left(Z > \frac{35-25}{8}\right)$$

$$= P(z > 1.25)$$

$$= 0.1056$$

$$(ii) \frac{100}{600} = 0.1667$$

$$P(X < t) = 0.1667$$

$$P\left(Z < \frac{t-25}{8}\right) = 0.1667$$

$$\frac{t-25}{8} = -0.967$$

$$t = 17.264$$

# Q16: YIK KELANTAN

(a) Kejayaan menjaring gol oleh seorang pemain bola jaring ialah 80%.

*The success of scoring a goal by a netball player is 80%.*

- (i) Cari kebarangkalian bahawa percubaan menjaringkan gol tidak melebihi 3 kali daripada 8 percubaan.

*Find the probability that an attempt to score a goal does not exceed 3 times out of 8 attempts.*

- (ii) Cari bilangan minimum percubaan pemain itu supaya kebarangkalian Berjaya menjaringkan gol sekurang-kurangnya sekali ialah 0.92.

*Find the minimum number of attempts by the player so that the probability of succeeding in scoring at least once is 0.92.*

[ 5 markah ]

[ 5 marks ]

- (b) Jisim emas,  $x$  kg yang dikeluarkan oleh satu kilang bertaburan secara normal.

Skor piawainya untuk  $x = 10$  kg dan  $x = 12$  kg masing-masing ialah -1 dan 2.

*The mass of gold,  $x$  kg produced by a factory is normally distributed. Its standard scores for  $x = 10$  kg and  $x = 12$  kg are and -1 and 2.*

- (i) Cari min dan sisihan piawai.

*Find the mean and standard deviation.*

- (ii) Seterusnya cari peratusan emas mempunyai jisim di antara 9 kg dan 11 kg.

*Next, find the percentage of gold that has a mass between 9 kg and 11 kg.*

For negative  $z$  use relation:

Bagi  $z$  negatif guna hubungan:

$$Q(z) = 1 - Q(-z) = P(-z)$$

$$f(z) = \frac{1}{\sqrt{2\pi}} \exp\left(-\frac{1}{2}z^2\right)$$

$$Q(z) = \int_k^{\infty} f(z) dz$$

Example / Contoh:

If  $X \sim N(0, 1)$ , then

Jika  $X \sim N(0, 1)$ , maka

$$P(X > k) = Q(k)$$

$$P(X > 2.1) = Q(2.1) = 0.0179$$
